

Releasing Back to Base in Aircraft Tactical Screen

The easiest almost full proof way to release an Airtanker back to local base is in the Aircraft Tactical Screen. It only gives you the Release To Base option.

☐ Reload Bases for [MT-MDC] ☒ All Airports

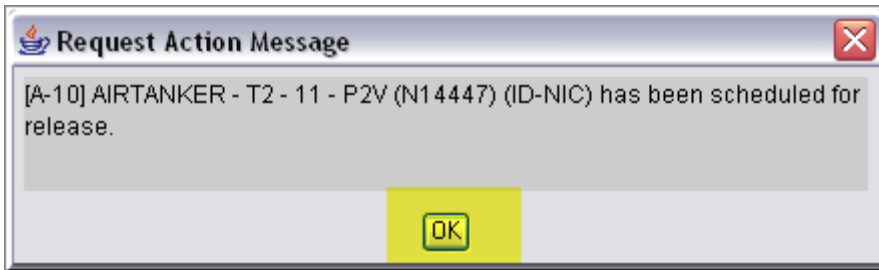

Make sure and check this box.

Airport Name	FAA Code	City	State
MISSOULA INTL	MSO	MISSOULA	MT

Highlight the one you want then click OK

OK Cancel

When you click on the Release To Base drop-down arrow another page opens up. The only quirk about this page is you need to make sure you have the **All Airports** checked or your airport may not show up within the list. It automatically comes up checked in Reload Bases when the box opens.

Once you have filled everything out and hit Release + the Request Action Message pops up, hit OK and you should be good.
